DESCRIPTION

The MICRO LAMBDA **New** X-Series oscillators are Low Noise sources covering the various frequency bands for VSAT applications. They are available in frequency bands to cover the entire Tri-Band range of 4.2-14.2 GHz, the C and X-Band frequency range of 4.6-8.9 GHz and the Ku-Band frequency range of 11.6-13.9 GHz. These oscillators have been specifically designed and ruggedized for superior microphonic performance required by commercial and military environments. All units in this series have specialized assembly and test processes to insure that the stringent microphonic requirements are met. They are field proven in the latest up and down converter designs currently being deployed. Unit sizes vary depending on frequency requirements, from 1.25" cube to VXI/VME and come with field replaceable SMA connectors.
